

KYD-N016 Disposable Surgical Cap Making Machine

1.Description:

This is a machine which produce the non woven surgical cap by the ultrasonic .Only one person is needed for the touch panel operation .PLC controlling program make the machine more stable .Imported reducing motor on the machine can help to reduce the rejection rate .The main material of the machine is aluminum which makes the machine durable and rustless .What's more , exchanging the molds on the machine can help to produce the surgical cap with different sizes .

2.Technical parameter:

Machine size:	6800*1160*1470mm	Pressure:	6kg/c m ²
Yield:	80-90pcs/min	Fuselage material:	Aluminium alloy
Machine weight:	2600KG	Control mode:	PLC
Voltage:	220V	Detection mode:	Photoelectric detection
Power:	5.7KW	Remark:	Change the size of the mold to be replaced

3.Feature

1. Multifunction and Higher Efficiency,lower trouble.
2. Stainless steel structure,independent electrical control box.
3. The parts surface adopts chorme dealing,covering parts of stainless steel,looking beautiful and clean.
4. Machine with Multifunction,and change the model for each different size shoes cover producing.
5. Automatic piece Account, Machine with Stop Protection.
