

KYD-U001 Pad Printing Machine

1. Description:

This machine is mainly used for one color printing (printing contents can be customized)Movement is left and right scratching horizontally and printing head moves vertically . There are three modes : manual , semi-automatic , automatic .The machine complied with international safety standards with safety slab rubber equipped and emergency power cut off system . Conversion motor drive , one line guide set , the printing pressure controlled by Taiwan cylinder , the printing platform used high strength materials , pore uniformity , can custom make according to demand , the head bedplate ,scraper easy to assemble , unassembled and clean , angle adjust easy .

2. Technical parameter:

Machine size:	720*460*1380mm	Pressure:	/
Yield:	15-20pcs/min	Fuselage material:	Aluminium alloy
Machine weight:	95KG	Control mode:	Simple line controller
Voltage:	220V	Detection mode:	Photoelectric detection
Power:	100W	Remark:	According to the size of the customer order mold

3. Feature

1. Multifunction and Higher Efficiency, lower trouble.
2. Stainless steel structure, independent electrical control box.
3. The parts surface adopts chrome dealing, covering parts of stainless steel, looking beautiful and clean.
4. Machine with Multifunction, and change the model for each different size shoes cover producing.
5. Automatic piece Account, Machine with Stop Protection.
