

KYD-U004 Ultrasonic Lace Making Machine

1.Description:

New model ultrasonic generator , no noise high frequency and vibration can avoid the edge pressing and hard edge which caused by traditional lace machines , the importing alloy steel head die is never over-heated and has long lifetime . The machine can make various pattern by ultrasonic sealing and pressing . Without sewing accessories high production efficiency , welding surface without burr .It can widely used in garment , toy , food , non woven bags , face mask , non woven products industry . The machine can sealing , pattern edge , cutting , trimming , suppress graphics , hole making , stripping , color printing , folding etc .

2.Technical parameter:

| | | | |
|-----------------|-----------------|--------------------|----------------------|
| Machine size: | 1300*500*1500mm | Pressure: | 6kg/c m ² |
| Frequency: | 120KHZ | Fuselage material: | Aluminium alloy |
| Machine weight: | 5140KG | Control mode: | / |
| Voltage: | 220V | Detection mode: | / |
| Power: | 2500W | Remark: | / |

3.Feature

1. Multifunction and Higher Efficiency,lower trouble.
2. Stainless steel structure,independent electrical control box.
3. The parts surface adopts chorme dealing,covering parts of stainless steel,looking beautiful and clean.
4. Machine with Multifunction,and change the model for each different size shoes cover producing.
5. Automatic piece Account, Machine with Stop Protection.
